On theſe days following the Judges ſit not at *Weſtminſter*.

In { Hillary / Eaſter / Trinity / Michael } Term, on { Candlemas / Aſcenſion / Midſummer / Allhallow } Day

A Deſcription of the four Quarters of the year
And firſt of Winter.
Sol in ♑ ♒ ♓.

WInter Quarter (after the Aſtronomers account) began the 11. of Decemb. 1665. and continues till the tenth of March this year 1666. at 6 a clock in the morning; ſo that alwayes the firſt part of the Aſtronomical Winter is in one Politick year, and the latter end thereof is in the other; at which time was the ſhorteſt day of the year, by reaſon of the Suns greateſt declination from the Equinoctial Line.

This ſeaſon of its own diſpoſition is known to be cold and moiſt, contrary to the quality of the Summer; and in this Quarter, the inward parts of man are very hot, and being healthful may receive plenty of Food, becauſe natural heat is now comforted, and is gone inward, and there increaſed, & maketh digeſtion the better.

How the Weather will be therein diſpoſed, is noted for each day throughout the Quarter.

The Sickneſſes whereunto this quarter is moſt enclined, are Rheums, Coats, Puſhes, Sore eyes, Melancholy, Coughs, Catharrs, Sciaticaes, pain in the Breaſt and Lungs, Head-ach, Falling-Sickneſs, diſeaſes proceeding of rotteneſs and corrupt

humors, with divers infirmities incident among Women.

Of the Second Quarter of the year, called the Spring, Sol in ♈. ♉. ♊.

The Spring time (being the most pleasant, and wholsom Season of the four) taketh it is beginning on Saturday the 10 of March, at 6 a clock in the morning, when the Sun entreth the first minute of the Equinoctial point, Aries, making the dayes and nights of equal length, which quarter endeth the 10 of June when the Sun entreth into Cancer.

This Season is naturally hot and moist, it is of the Sanguine complexion, being the most temperate and healthfull time of the year, and is therefore accounted the fittest time to ease diseased bodies in, and to restore health again in those in whom formerly it hath been decaied by any kind of evacuation.

The particular condition thereof may be seen in the daily disposition of the season.

The Infirmities of this Quarter are Measels, Melancholy, Madness, Small-pox, Falling-sickness, Bleeding at the Nose, Hoarseness, Coughs, Scabs, Agues, Colick, the Gout, and pain in the joynts, Plurisies, Shortness of Breath, Faintings, Gaiet in the Eyes, Burning Fevers, and many other strange Diseases and distempers proceeding of corrupt blood.

Of

Of the third Quarter of the year, called Summer, Sol in ♋. ♌. ♍.

SUmmer (the third quarter of the year Aſtronomical) taketh always its beginning at the time of the Suns entrance into the firſt minute of the Solſtitial Sign Cancer, which is this year on Monday the 11 of June, at 9 of the clock in the morning, at which time he makes his greateſt declination from the Equinoctial towards the North. and cauſeth the longeſt day, and ſhorteſt night, & ſo Summer holdeth on till the 12 of Sept. following.

In this Quarter the Stomach cannot digeſt ſuch hard meats as it will in the Winter ſeaſon, for that natural heat is now diſtributed into the exterior parts, and man is not now ſo hot within as in Winter.

As for the diſpoſition of the weather, you may ſee in the daily inclination.

The Sicknelles at this time are divers as Burning-Agues, Pluriſies, Frenzies, hot Apoſthumes, divers pains in the Head, ſundry Inflamations, and new infirmities proceeding eſpecially of hot cholerick humors, wherewith many will be greatly moleſted.

Of the fourth Quarter of the year, called Autumn or fall of the Leaf. Sol in ♎ ♏ ♐.

AUtumne or Harveſt (being the fourth and laſt Quarter of the year) beginneth

on Wednesday the 12 of September near 12 at night, the Sun then making his entrance into the first minute of the second Equinoctial sign Libra, working the same effect that he did at his entring into Aries; that is, making the days and nights of equal length, he rising at six in the morning, and setting at six at night; and this Quarter doth last until the 11 of December following.

The quality of this season is naturally cold and dry; yet by reason of its mutability, it is the most unwholsom, by means whereof it is more subject to Sickness then any of the other; for the dregs of all Diseases of the former parts of the year, will now burst forth and be seen.

How the Air is like to be inclined all Harvest, may be seen in the daily disposition of the Season.

The Diseases of this Quarter are many and dangerous, as, Black-Jaundies, Pegrims, the Falling-Sickness, Opilations in the Spleen, difficulty of breathing, Convulsions, Dropsies, Sciaticaes, Biles, Tooth-ach, and many more; From which good Lord deliver us.

Of the Eclipses this year.

There will happen four Eclipses this present year, 1666. two of the Sun, and as many

many of the Moon; whereof the first of the Sun will onely be conspicuous in England.

The first Eclipse is of the Moon, on Wednesday the 6 of June, a little before Sunset, to be seen in Muscovia, Tartaria, China, Arabia, Italy, Germany, Hungaria, &c. and it will not be quite ended when the Moon begins to appear in our Horizon.

The second Eclipse is of the Sun, upon Friday the 22 of June, in the forenoon, which will be seen in England.

	Ho.	Min.	
The beginning at	5	28	In the morning.
The middle at	6	25	
The end at	7	20	

And here you are to note that the South-part of the Sun will be darkned 7 points and 25 minutes.

The Third is of the Moon, upon the 1 of December to be seen in both the Java's, in the Oriental Kingdom of Bengala, in Cambula, Melair, Japonia, Xicoa, and in the Philippine and Molucque Illands.

The fourth is of the Sun upon the 15 of December, to be seen onely in the Southern parts of the Earth, in Magellanica, and other places unknown to us.

Here followeth certain Phyſical verſes, with a deſcription how the Planets are placed in the Heavens, either before or after the Sun; whereby you may perceive how they keep their motions day and night. To which is annexed the time of the New, Full, and Quarters of the Moon, with the daily diſpoſition of the weather. Alſo ſhort Rules for Husbandry for every moneth throughout the year.

Of Ianuary.

IF thou be ſick, and help wouldſt have,
The counſel of the Learned crave:
If thou haſt health, to keep thee ſo,
Fly idleneſs as deadly fo.

The

The 25, 26 and 27 wind and storms.
The 28 29 and 30 clearing up.
First Quarter on Thursday the 31 day, 3 min. past 1 a clock in the morning.

Mays Instructions.

In the beginning of this month, you may sow the seeds of Summer Herbs, which could not endure the cold of the fore-passed months, you may yet sow Hemp and Flax, weed your Hop-Gardens, and take away superfluous Branches, and mow your Gardens.

Of June.

DRinks new or sweet taste not at all,
For thereby grows no danger small:
And to thy self such pastime take,
As may in God thee merry make.

Saturn riseth presently after Sun-set.
Jupiter is past South East at Sun-rise.
Mars is past the South at Sun-set.
Venus sets a little after the Sun.
Mercury riseth a while before the Sun
The 1, 2 and 3 fair.
The 4 and 5 not amiss.
Full Moon on Wednesday the 6 day, 19 min. past 7 a clock at night.
The 6, 7 and 8 fair windy weather.
The 9 and 10 seasonable.
The 11, 12 and 13 somewhat cloudy.
Last Quarter on Thursday the 14 day, 3 min. past 10 a clock in the forenoon.

The 14, 15 and 16 rain and thunder.
The 17 and 18 fairer.
The 19, 20 and 21 seasonable.
New Moon on Friday the 22 day, 38 min past 7 a clock in the morning.
The 22 and 23 very milde.
The 24. 25 and 26 not much altering.
The 27 and 28 the winde is stirring.
First Quarter on Friday the 29 day, 45 min. past 5 a clock in the morning.
The 29 and 30 winde and thunder.

Junes Instructions:

In this month (at the full of the Moon) gather your herbs to keep dry for the whole year; weed your corn-fields and gardens, set Rosemary and Gilly-Flowers, sow Lettice, shear sheep, the Moon increasing.

Of July.

PErfume thy house with savours sweet,
But such as are for purpose meet:
Abroad as thou in Streets doest go,
Defend thy self from Stinks also.

Saturn is South East at Sun-set.
Jupiter is South at Sun-rise.
Mars is South-West at Sun-set.
Venus is in the West at Sun-set. Mercury cannot be seen.
The 1 and 2 dayes very warm.
The 3, 4 and 5 some drops.

Full

Full Moon on Friday the 6 day, 31 min. past 5 a clock in the morning.

The 6 and 7 thunder and lightning.

The 8, 9 and 10 windes and thunder.

The 11, 12 and 13 some remission.

Last Quarter on Saturday the 14 day, 51 min. past 3 a clock in the morning.

The 14 and 15 temperate.

The 16, 17 and 18 high windes.

The 19 and 20 warm.

The 21, 22 and 23 fair and seasonable.

The 24 and 25 fitting for Harvest.

The 26 and 27 fresh gales.

First Quarter on Saturday the 28 day, 57 min. past 10 a clock before noon.

The 28, 29, 30 and 31 some dropping clouds.

July's Instructions.

In this moneth ply your Haying, fallow your land for Wheat, pull up Hemp that is ripe, get Rue and Wormwood to drive away Fleas and Mothes; dry Flowers in the shade, and then sun them a little, for fear of corruption.

Of August.

AS burning heat will thee destroy,
So shivering cold will thee annoy:
Let little sleep thee now content,
Purge not, nor bleed, lest thou repent.

Saturn

Saturn is almost South at Sun-set.
Jupiter is South West at Sun rise.
Mars is South West at Sun-set.
Venus goes down a little after the Sun, and follows Mercury to Bed.
The 1, 2 and 3 days indifferent.

The 11, 12 and 13 fair.
The 14, 15 and 16 winde and hail.

New Moon on Wednesday the 17 day, 17 min. past 8 a clock at night.

The 17 and 18 good weather.

The 19, 20 and 21 warm.

The 22 and 23 hail

First Quarter on Wednesday the 24 day, 33 min. past 4 a clock in the afternoon.

The 24, 25 and 26 indifferent.

The 27, 28 and 29 cold rain, hail or sleet.

The 30 and 31 some clouds.

Octobers Instructions.

Remove young Plants and Trees in the new of the moon, and about the Full of the Moon gather such fruit as you left ungathered the last month. Set all kinde of Nuts and Acorns, and cut your Rose-trees but once in two years, if you intend to have store of Roses.

Of November

IF Rheumes do now molest thy head,
It is not ill to sweat in bed.
Feed on good meats if stomack serve,
Else seek for that which doth preserve.

Saturn is South-West at Sun-set.

Jupiter is full South-East at the same time.

Mars and Venus are in the West at Sun-set.

Mercury coucheth close under the Sun.

Full Moon on Alhollow-day, 5 min. past 8 a clock at night.

The 1, 2 and 3. days fair and seasonable.

The 4 and 5 not much differing.

The

The 6, 7 and 8 indifferent.

Last Quarter on Friday the 9 day, 42 min. past 2 a clock in the afternoon.

The 9 and 10 frost like.

The 11, 12 and 13 windes, rain or snow.

The 14 and 15 meze remiss.

New Moon on Friday the 16 day, 19 min. past 6 a clock in the morning.

The 16. 17 and 18 fair.

The 19 and 20 remission of cold.

The 21 and 22 indifferent.

First Quarter on Friday the 23 day, 33 min. past 9 a clock in the afternoon.

The 23 24 and 25 high windes.

The 26 and 27 frost like.

The 28 29 and 30 not amiss.

Novembers Instructions.

In the New of the Moon remove young trées, set Crab-trée Stocks to graft on, and in the old of the Moon set Pease and Beans, sow Parsneps and Carrets, make Mault, kill hogs, and make Martimas Beef.

Of December.

NOw cold December is come in,
The poor Mans back is clothed thin;
Then feed and cloathe him as you may,
The Lord will it three-fold repay.

Saturn and Mercury are near the Sun.

Jupiter is South at Sun-set.

Mars and Venus are bright in the West after Sun-set.

Full

A Prognostication.

Full Moon the 1 day being Saturday, 42 min. past 2 at night in the afternoon.

The 1, 2 and 3 days fair and windy.

The 4 and 5 reasonable.

The 6, 7 and 8 not very cold.

Last Quarter on Saturday the 9 day, 12 min. past 1 a clock in the morning.

The 9, 10 and 11 something cloudy.

The 12, 13 and 14 cold.

New Moon on Saturday the 15 day, 12 min. past 6 a clock at night.

The 15, 16 and 17 winde and snow.

The 18 and 19 moist.

First Quarter on Sunday the 23 day, 7 min. past 6 in the morning.

The 23, 24 and 25 some cloudy.

The 26, 27 and 28 not amiss.

The 29, 30 and 31 Seasonable.

Full Moon on Monday the 31 day, 19 min. past 7 a clock in the morning.

Decembers Instruction.

This moneth and the next are best to fell great Timber in the old of the Moon; uncover the roots of your Fruit-trees, Fallow land for Barley, cover your Herbs from cold, look well to your Cattel, take Fowls with Nets, or Lime twigs.

The

The Distance of the Seven Planets from the Earth in English miles.

Saturn is distant from the Earth forty seven millions, seven hundred and eight thousand, seven hundred and fifty miles.

Jupiter is removed from the Earth twenty six millions, thirty thousand, nine hundred and twenty miles.

Mars is distant from the Earth seven millions, six hundred fifty eight thousand, five hundred and forty miles.

The Sun is distant from the Earth five millions, and twenty two thousand, three hundred and three miles.

Venus and Mercury (in their mean motions) are distant as the Sun, though sometimes they are far nearer, and sometimes again farther removed.

The Moon is distant from the Earth two hundred and eight thousand, two hundred and ninety miles.

Psal. 19. 1.

The Heavens declare the glory of God, and the Firmament sheweth his handy-work.
